

Answer the following:

1. The microprocessor 8085 is ____ bit processor. []
a. 8 bit b. 16 bit c. 20 bit d. None
2. What is the size of address bus in 8085? []
a. 16 bit b. 20 bit c. 32 bit d. None
3. What is the length of instruction queue in 8086? []
a. 4 KB b. 4 bytes c. 6 bytes d. None
4. Which of the following is not a flag in the 8085 microprocessor []
a. Overflow b. carry c. zero d. Parity
5. The memory capacity of 8086 is..... []
a. 512kb b. 1024kb c. 64kb d. None
6. Which interrupt has highest priority in 8085 []
a. INTR b. TRAP c. RST 6.5 d. RST 7.5
7. If CLD instruction is executed then DF= []
a.0 b. 1 c. a & b d. None
8. Which group of instructions does not affect the 8085 flags? []
a. Data Transfer b. Arithmetic c. Logical d. Rotate
9. Find the Effective address if DS = ABCDH and BX = CDBAH []
a. B7A8AH b. B7A7AH c. B8A7AH d. B8A7AH
10. What is the size of offset address in 8086----- []
a. 16 bits b. 20 bits c. 32 bits d. 8 bits
11. MOV AX, [SI] is an example of _____ addressing mode.
12. _____ pin in 8086 decides the mode of operation of 8086.
13. The CALL instruction stores the return address of the main program onto the _____
14. If the microprocessor has 20 address lines then it contains _____ memory locations.
15. _____ flag is set if the carry forwarded from lower nibble to upper nibble.
16. Expand CMC _____.
17. _____ instruction is used to return to ISR to main program.
18. MOV A, M is a _____ byte instruction.
19. BP register is used as offset register by default for the _____ segment.
20. Direction flag is used with _____ instruction

Answer the following:

1. The microprocessor 8085 is ____ bit processor. []
a. 8 bit b. 16 bit c. 20 bit d. None
2. What is the size of address bus in 8085? []
a. 16 bit b. 20 bit c. 32 bit d. None
3. What is the length of instruction queue in 8086? []
a. 4 KB b. 4 bytes c. 6 bytes d. None
4. Which of the following is not a flag in the 8085 microprocessor []
a. Overflow b. carry c. zero d. Parity
5. The memory capacity of 8086 is..... []
a. 512kb b. 1024kb c. 64kb d. None
6. Which interrupt has highest priority in 8085 []
a. INTR b. TRAP c. RST 6.5 d. RST 7.5
7. If CLD instruction is executed then DF= []
a.0 b. 1 c. a & b d. None
8. Which group of instructions does not affect the 8085 flags? []
a. Data Transfer b. Arithmetic c. Logical d. Rotate
9. Find the Effective address if DS = ABCDH and BX = CDBAH []
a. B7A8AH b. B7A7AH c. B8A7AH d. B8A7AH
10. What is the size of offset address in 8086----- []
a. 16 bits b. 20 bits c. 32 bits d. 8 bits
11. MOV AX, [SI] is an example of _____ addressing mode.
12. _____ pin in 8086 decides the mode of operation of 8086.
13. The CALL instruction stores the return address of the main program onto the _____
14. If the microprocessor has 20 address lines then it contains _____ memory locations.
15. _____ flag is set if the carry forwarded from lower nibble to upper nibble.
16. Expand CMC _____.
17. _____ instruction is used to return to ISR to main program.
18. MOV A, M is a _____ byte instruction.
19. BP register is used as offset register by default for the _____ segment.
20. Direction flag is used with _____ instruction

Answer the following:

1. Which interrupt has highest priority in 8085 []
a. INTR b. TRAP c. RST 6.5 d. RST 7.5
2. If CLD instruction is executed then DF= []
a. 0 b. 1 c. a & b d. None
3. Which group of instructions does not affect the 8085 flags? []
a. Data Transfer b. Arithmetic c. Logical d. Rotate
4. What is the size of address bus in 8085? []
a. 16 bit b. 20 bit c. 32 bit d. None
5. The memory capacity of 8086 is..... []
a. 512kb b. 1024kb c. 64kb d. None
6. Find the Effective address if DS = ABCDH and BX = CDBAH []
a. B7A8AH b. B7A7AH c. B8A7AH d. B8A7AH
7. The microprocessor 8085 is ____ bit processor. []
a. 8 bit b. 16 bit c. 20 bit d. None
8. What is the length of instruction queue in 8086? []
a. 4 KB b. 4 bytes c. 6 bytes d. None
9. Which of the following is not a flag in the 8085 microprocessor []
a. Overflow b. carry c. zero d. Parity
10. What is the size of offset address in 8086----- []
a. 16 bits b. 20 bits c. 32 bits d. 8 bits
11. MOV AX, [SI] is an example of _____ addressing mode.
12. Expand CMC _____.
13. _____ flag is set if the carry forwarded from lower nibble to upper nibble.
14. Direction flag is used with _____ instruction.
15. MOV A, M is a _____ byte instruction.
16. BP register is used as offset register by default for the _____ segment.
17. The CALL instruction stores the return address of the main program onto the _____.
18. If the microprocessor has 20 address lines then it contains _____ memory locations.
19. _____ pin in 8086 decides the mode of operation of 8086.
20. _____ instruction is used to return to ISR to main program

Answer the following:

1. Which interrupt has highest priority in 8085 []
a. INTR b. TRAP c. RST 6.5 d. RST 7.5
2. If CLD instruction is executed then DF= []
a. 0 b. 1 c. a & b d. None
3. Which group of instructions does not affect the 8085 flags? []
a. Data Transfer b. Arithmetic c. Logical d. Rotate
4. What is the size of address bus in 8085? []
a. 16 bit b. 20 bit c. 32 bit d. None
5. The memory capacity of 8086 is..... []
a. 512kb b. 1024kb c. 64kb d. None
6. Find the Effective address if DS = ABCDH and BX = CDBAH []
a. B7A8AH b. B7A7AH c. B8A7AH d. B8A7AH
7. The microprocessor 8085 is ____ bit processor. []
a. 8 bit b. 16 bit c. 20 bit d. None
8. What is the length of instruction queue in 8086? []
a. 4 KB b. 4 bytes c. 6 bytes d. None
9. Which of the following is not a flag in the 8085 microprocessor []
a. Overflow b. carry c. zero d. Parity
10. What is the size of offset address in 8086----- []
a. 16 bits b. 20 bits c. 32 bits d. 8 bits
11. MOV AX, [SI] is an example of _____ addressing mode.
12. Expand CMC _____.
13. _____ flag is set if the carry forwarded from lower nibble to upper nibble.
14. Direction flag is used with _____ instruction.
15. MOV A, M is a _____ byte instruction.
16. BP register is used as offset register by default for the _____ segment.
17. The CALL instruction stores the return address of the main program onto the _____.
18. If the microprocessor has 20 address lines then it contains _____ memory locations.
19. _____ pin in 8086 decides the mode of operation of 8086.
20. _____ instruction is used to return to ISR to main program

Answer the following:

1. Which interrupt has highest priority in 8085 []
a. INTR b. TRAP c. RST 6.5 d. RST 7.5
2. If CLD instruction is executed then DF= []
a.0 b. 1 c. a & b d. None
3. Which group of instructions does not affect the 8085 flags? []
a. Data Transfer b. Arithmetic c. Logical d. Rotate
4. Find the Effective address if DS = ABCDH and BX = CDBAH []
a. B7A8AH b. B7A7AH c. B8A7AH d. B8A7AH
5. What is the size of offset address in 8086----- []
a. 16 bits b. 20 bits c. 32 bits d. 8 bits
6. The microprocessor 8085 is ____ bit processor. []
a. 8 bit b. 16 bit c. 20 bit d. None
7. What is the size of address bus in 8085? []
a. 16 bit b. 20 bit c. 32 bit d. None
8. What is the length of instruction queue in 8086? []
a. 4 KB b. 4 bytes c. 6 bytes d. None
9. Which of the following is not a flag in the 8085 microprocessor []
a. Overflow b. carry c. zero d. Parity
10. The memory capacity of 8086 is..... []
a. 512kb b. 1024kb c. 64kb d. None
11. Expand CMC _____.
12. _____ instruction is used to return to ISR to main program.
13. MOV A, M is a _____ byte instruction.
14. BP register is used as offset register by default for the _____ segment.
15. Direction flag is used with _____ instruction
16. MOV AX, [SI] is an example of _____ addressing mode.
17. _____ pin in 8086 decides the mode of operation of 8086.
18. The CALL instruction stores the return address of the main program onto the _____
19. If the microprocessor has 20 address lines then it contains _____ memory locations.
20. _____ flag is set if the carry forwarded from lower nibble to upper nibble.

Answer the following:

1. Which interrupt has highest priority in 8085 []
a. INTR b. TRAP c. RST 6.5 d. RST 7.5
2. If CLD instruction is executed then DF= []
a.0 b. 1 c. a & b d. None
3. Which group of instructions does not affect the 8085 flags? []
a. Data Transfer b. Arithmetic c. Logical d. Rotate
4. Find the Effective address if DS = ABCDH and BX = CDBAH []
a. B7A8AH b. B7A7AH c. B8A7AH d. B8A7AH
5. What is the size of offset address in 8086----- []
a. 16 bits b. 20 bits c. 32 bits d. 8 bits
6. The microprocessor 8085 is ____ bit processor. []
a. 8 bit b. 16 bit c. 20 bit d. None
7. What is the size of address bus in 8085? []
a. 16 bit b. 20 bit c. 32 bit d. None
8. What is the length of instruction queue in 8086? []
a. 4 KB b. 4 bytes c. 6 bytes d. None
9. Which of the following is not a flag in the 8085 microprocessor []
a. Overflow b. carry c. zero d. Parity
10. The memory capacity of 8086 is..... []
a. 512kb b. 1024kb c. 64kb d. None
11. Expand CMC _____.
12. _____ instruction is used to return to ISR to main program.
13. MOV A, M is a _____ byte instruction.
14. BP register is used as offset register by default for the _____ segment.
15. Direction flag is used with _____ instruction
16. MOV AX, [SI] is an example of _____ addressing mode.
17. _____ pin in 8086 decides the mode of operation of 8086.
18. The CALL instruction stores the return address of the main program onto the _____
19. If the microprocessor has 20 address lines then it contains _____ memory locations.
20. _____ flag is set if the carry forwarded from lower nibble to upper nibble.

Answer the following:

1. The microprocessor 8085 is ____ bit processor. []
a. 8 bit b. 16 bit c. 20 bit d. None
2. Which of the following is not a flag in the 8085 microprocessor []
a. Overflow b. carry c. zero d. Parity
3. The memory capacity of 8086 is..... []
a. 512kb b. 1024kb c. 64kb d. None
4. Which group of instructions does not affect the 8085 flags? []
a. Data Transfer b. Arithmetic c. Logical d. Rotate
5. Find the Effective address if DS = ABCDH and BX = CDBAH []
a. B7A8AH b. B7A7AH c. B8A7AH d. B8A7AH
6. What is the size of address bus in 8085? []
a. 16 bit b. 20 bit c. 32 bit d. None
7. What is the length of instruction queue in 8086? []
a. 4 KB b. 4 bytes c. 6 bytes d. None
8. What is the size of offset address in 8086----- []
a. 16 bits b. 20 bits c. 32 bits d. 8 bits
9. Which interrupt has highest priority in 8085 []
a. INTR b. TRAP c. RST 6.5 d. RST 7.5
10. If CLD instruction is executed then DF= []
a.0 b. 1 c. a & b d. None
11. If the microprocessor has 20 address lines then it contains _____ memory locations.
12. The CALL instruction stores the return address of the main program onto the _____
13. BP register is used as offset register by default for the _____ segment.
14. MOV AX, [SI] is an example of _____ addressing mode.
15. MOV A, M is a _____ byte instruction.
16. Direction flag is used with _____ instruction
17. _____ pin in 8086 decides the mode of operation of 8086.
18. _____ flag is set if the carry forwarded from lower nibble to upper nibble.
19. Expand CMC _____.
20. _____ instruction is used to return to ISR to main program.

1. The microprocessor 8085 is ____ bit processor. []
a. 8 bit b. 16 bit c. 20 bit d. None
2. Which of the following is not a flag in the 8085 microprocessor []
a. Overflow b. carry c. zero d. Parity
3. The memory capacity of 8086 is..... []
a. 512kb b. 1024kb c. 64kb d. None
4. Which group of instructions does not affect the 8085 flags? []
a. Data Transfer b. Arithmetic c. Logical d. Rotate
5. Find the Effective address if DS = ABCDH and BX = CDBAH []
a. B7A8AH b. B7A7AH c. B8A7AH d. B8A7AH
6. What is the size of address bus in 8085? []
a. 16 bit b. 20 bit c. 32 bit d. None
7. What is the length of instruction queue in 8086? []
a. 4 KB b. 4 bytes c. 6 bytes d. None
8. What is the size of offset address in 8086----- []
a. 16 bits b. 20 bits c. 32 bits d. 8 bits
9. Which interrupt has highest priority in 8085 []
a. INTR b. TRAP c. RST 6.5 d. RST 7.5
10. If CLD instruction is executed then DF= []
a.0 b. 1 c. a & b d. None
11. If the microprocessor has 20 address lines then it contains _____ memory locations.
12. The CALL instruction stores the return address of the main program onto the _____
13. BP register is used as offset register by default for the _____ segment.
14. MOV AX, [SI] is an example of _____ addressing mode.
15. MOV A, M is a _____ byte instruction.
16. Direction flag is used with _____ instruction
17. _____ pin in 8086 decides the mode of operation of 8086.
18. _____ flag is set if the carry forwarded from lower nibble to upper nibble.
19. Expand CMC _____.
20. _____ instruction is used to return to ISR to main program.
