Report on Expert Talk on REPORT ON "ONE DAY TECHNICAL WRITING COMPETITION"

The Department of Mechanical Engineering organized Technical WRITING on Robot Kinematics to the students of III B.Tech in collaboration with IIC, from 09-03-2023 to 11-03-2023.

In robotics, robot kinematics applies geometry to the study of the movement of multi-degree of freedom kinematic chains that form the structure of robotic systems. The emphasis on geometry means that the links of the robot are modeled as rigid bodies and its joints are assumed to provide pure rotation or translation

All the students were engulfed with lots of knowledge based on latest IOT technological Ideas and much more depth on Robotics subject. Each student in the class was highly benefited with this event conduction.

He is a senior member of IEEE. He worked as Assistant Professor in the Department of ECE at Defense Institute of Advanced Technology (DIAT), DRDO, Pune. His current areas of interest include: Global Navigation Satellite Systems under Water Communication, Wireless and Mobile Communications, Electronics Warfare Applications, Software Defined Radio, Wireless Networks, Indoor Navigation and Mobile Ad-Hoc Networks. He published 40+papers in National and International Journals. He successfully completed six funding projects. He received best teacher award in the year 2016 from Defense institute of advanced technology pune and also received an appreciation letter by Honorable Vice Chancellor, DRDO, Bangalore for successful completion of the sponsored projects.

He delivered a talk on 5th generation mobile networks. It is a new global wireless standard after 1G, 2G, 3G, and 4G networks. 5G enables a new kind of network that is designed to connect virtually everyone and everything together including machines, objects, and devices. He also explained the differences between 1G, 2G, 3G, 4G and 5G networks with pros and cons. Emerging 5G networks feature lower latency, higher capacity, and increased bandwidth compared to 4G. Finally he stated 5G denote the next major phase of mobile telecommunication standards beyond the upcoming 4G standards. 5G technology will change the way and most high bandwidth users access their phones. With 5G pushed over a VOIP enabled device, people will experience a level of call volume and data transmission that people never experienced before.
