## **GPCET - INSTITUTIONAL PERSPECTIVE PLAN**

Over the span of 15 years, G Pullaiah College of Engineering & Technology has dedicated itself to constructing both physical infrastructure and operational mechanisms geared towards fostering the development of outstanding graduates. The institution has successfully shaped young talents into a disciplined, task-oriented, and value-driven workforce, earning the distinction of being recognized as the "best place to pursue technical education" in Andhra Pradesh. Despite facing numerous challenges, the college has consistently expanded its laboratories, library resources, and computing facilities.

Positioning itself as a frontrunner in technical education, the institute has made significant contributions to the academic landscape by publishing international papers in reputable journals and conferences. In an ambitious move, the college now aspires to transition from being "the finest educational institute" to becoming a "center of excellence in R&D," leading cutting-edge research in various technologies.

To achieve this transformation, the institution is actively working on building advanced research facilities, recruiting faculty with expertise in research and development, forming interdisciplinary teams of researchers, fostering networks with both national and international universities, and instigating a shift in the faculty culture, emphasizing a serious commitment to research.

Furthermore, the college aims to enhance student employability, addressing the challenges posed by the job market slowdown. Simultaneously, the institution is channeling efforts into boosting campus research and development activities, focusing on socially relevant issues. This strategic approach aligns with the institution's overarching vision, propelling it towards becoming a beacon of excellence in both academia and research.
